

to End Opposing Political Parties in America's System of Governance

To my fellow Millennials and Gen 2020. As our grandparents' generation nears the phase of transitioning and our parents' generation nears the retirement phase of life, we have to understand that this is OUR children's future now, and it is up to us to plan for what life will be like tomorrow. We don't have any more time to say we can't or make any excuses for putting our energy into what we were born into- **The Seed of Division**.

We ought to view this life as a transfer portal in which we have the opportunity to experience and appreciate everything that those before us have created. Every one of us must use the gifts we have been given to improve the portal for the next generations and ensure that they are free and safe. Generations before us have been programmed to understand the term 'sharing' as a divisive practice as an 'adult,' but virtuous as a 'child.' What we must understand is that when one organ of the body takes too much or too little of what is necessary for it to function, then the next part will receive too much or too little necessary for *it* to function. What this means is that the body as a whole **WILL NOT** function properly as it can be considered to be in a cancerous state. For this reason, we have to learn how to share by being united, disciplined, and educated consumers from those that provide a service or product.

It is time that we begin to learn how to separate ourselves from the opposing political party system in America as we have continued to provide oxygen for The Seed of Division by arguing about the same subject matters for generation after generation. We have futuristic matters that we need to address **RIGHT NOW** as we are already behind schedule. The difference between the Bloods and Crips, and Republicans and Democrats, is that innocent victims are caught in the crossfire of rival gangs while 'The People' continue to put themselves between two rival gangs during their crossfire. We must understand that these are business entities that have the purpose to put their rivals out of business by any means necessary. 'The People' have always had the most powerful tool in their arsenal which is the freedom to unite against businesses that have an interest more about destroying their rivals than working *4 Us*. The opposing political party system **WILL NOT** work for our generations moving forward for the reason that by attacking one another we create an autoimmune disorder which makes us susceptible to external infections from domestic and foreign adversaries waiting for the opportunity to inject their virus. Open wounds will provide Artificial Intelligence and America's Corporate Agenda that is already under the jurisdiction of The Ruler of ALL Evil the pathogen to ensure that the human person no longer has free-will. The battle in which we are in is 'The People' v. Artificial Intelligence and America's Corporate Agenda and for this reason the anti-virus is a single unified **Purple Party** or what shall be known as **The Party 4 Us**.

There are two Philosophical Principles of **The Party 4 Us**:

- 1) "A human person is created for a reason and brought into existence with a purpose to fulfill that is determined through their *own* free-will."
- 2) "Sharing is not redistribution of wealth, it's being a united, educated, and disciplined consumers by no longer providing The Source of Funding to those that live to only benefit themselves or a finite group."

America's Corporate Agenda is KILLING 'The People' while we fight and kill one another instead of learning how to address the matter in a constructive and civil manner- *together*. This has happened for the reason that America does not have an Education System. What we have is a Corporate Training Manual that forms Bosses, Employees, and Customers. This manual keeps us at war with one another and dependent on the corporate agenda. What we need to recognize is that we have the power to control our own lives not through fighting against another system, but through designing and only using systems formed *4 Us*. My name is Michael Duncombe, I am the Founder and President of Scholarships 4 Us®. For the past 4 years I have been rewriting America's 400 year old scholarship system so that 'The People' are no longer dependent on the donor and sponsor, and collegiate athletic scholarship systems. I have achieved this for the reason that I learned what a scholarship 'is' by definition. With the establishment of **The Trust of Scholarships 4 Us®** we will revolutionize our after school youth sports and activities to use our own money to fund The Scholarship System 4 Us.

Our objective today is not to use our energy to be afraid of the things that we can't control, but to plant The Seed of Goodwill and provide it the nutrients necessary to function as a whole so when our generations near the phase of transition- we can prepare to rest in peace. It's time to get to work! Share this Memo and follow and like Scholarships 4 Us® on Facebook. What we need are those that understand Political Science and have been waiting for the opportunity to fulfill their purpose to upload a response video expressing your willingness to lead.
